 8. Write all your answers on the answer sheet.
-

Part I Reading Comprehension

Reading I

Family Portrait

It's family portrait day! All the relatives are here, in Chicago, to take a great family photo.

I'm Raphael and Chicago is my hometown. I live here with my wife, Marissa, and my two kids, Andrew and Blair.

My older brother and his family still live in Chicago, too. They live near us, so we see them a lot. My sister-in-law and my three nieces come over almost every afternoon to visit.

My parents don't live in the city now. They live in a small town about an hour from Chicago. They like living there. But they visit us very often.

My younger brother lives in New York. He's an actor and he's single. We don't see him very often. We usually keep in touch by e-mail. But he's here in Chicago today.

My grandmother, Gilda, is here today too! She is 93 years old now. She doesn't visit very often, so it's wonderful to see her. She lives with my aunt Mary-Angela and my uncle Ross. They live in a small town near my parents.

My aunts, Felicia and Rosemary, are here. And my cousins, Tomas and Ricardo, are here, too. Even my uncle Joe is here with his dog, Leon! The whole family is here. Now, it's time to take the portrait!

A. Choose the best answer. Write only *a*, *b*, *c*, or *d* on your answer sheet. (5 points)

1. Marissa is _____.

- a. Raphael's wife
- b. Raphael's grandmother
- c. Raphael's daughter

5. Raphael's _____ is 93 years old.

- a. grandfather
- b. grandmother
- c. uncle
- d. aunt

Reading II

AIBO

AIBO (Artificial Intelligence robot) is a robot dog, developed by Sony. He is 27.4 cm long, 26.6 cm high, and weighs 1.5 kilos. You can control him with a computer, a remote control, or with voice instructions. AIBO is not just a toy, Sony developed and tested him as an electronic friend for old people.

Movable Parts

- Mouth: 1 degree of freedom

- Head: 3 degrees of freedom
- Legs: 3 degrees of freedom x 4 legs (removable)
- Ears: 1 degree of freedom x 2 ears
- Tail: 2 degrees of freedom
- Total: 20 degrees of freedom

He needs a 9V battery and can operate for approximately 1.5 hours.

Price: approximately \$1,300.

Here are some things AIBO can do:

- walk and run backwards and forwards
- stand on his back legs and raise and lower his front legs
- see and remember things
- understand the name you give him
- dance
- understand 75 different voice instructions (*Sit!* *Come!* *No!*, etc.)
- take photographs
- make robotic dog sounds
- learn new actions
