King Mongkut's University of Technology North Bangkok

เลขที่นั่งสอบ

Midterm Examination of Semester 2

Year: 2017

Subject: 393142 English II

Section: 15-18

Date: 05 March 2018

Time: 10:00 – 12:00

Name: ID: Class:

Instructions:

1. The examination has 13 pages (including this page) with 4 parts and total score of 40 points.
2. You have to use this exam paper and answer sheet for answers.
3. This is a closed book examination.
4. This is a 2 hours exam. You are not allowed to leave the exam room during the first 1 hour after the beginning of the exam.
5. You are not allowed to open the exam papers or start to answer before the proctor's permission.
6. You are not allowed to use the restroom during the exam except in case of an emergency.
7. No documents are allowed to be taken out of the examination room.
8. Electronic communications devices and dictionaries are not allowed in the examination room.
9. You should only answer your section's questions at vocabulary part!

Cheating in the exam is considered an extremely serious offence which will result in expulsion from the University.
--

Part I Comprehension:

Please read the passage below and choose the answer which you think fits best according to the text (3 pts.)

Students can be divided into various categories. See which one(s) you fit into.

The Know-It-All: These students think they know everything. They always answer the teacher's questions, and they never will admit that they're wrong.

The Teacher's Pet: This kind of student sits in front of the class, pays attention to everything the teacher says, usually raises his/her hand to answer questions, and is always near the teacher.

The Hardworking Type: This student takes notes in class, reviews material at home, always does homework, and gets good grades.

The Lazy Type: These students are irresponsible. They sometimes fall asleep in class, study little, and hardly ever do homework. Their grades are always bad.

The Friendly Type: This student is popular with all the classmates. He/she usually copies homework from other students' notebooks and always asks for help during tests.

The Firefighter: These students are always in a hurry. They usually study for tests or exams the night before, and they do their homework and assignments just before the deadline.

The Talker: This student doesn't stop talking in class and never listens to what the teacher is saying.

The Poor Student: This student studies really hard, does homework, but always gets poor grades.

The Average Guy: This student pays attention in class, does homework, and studies enough to get passing grades.

The Comedian: Every class has one. These students love to laugh at their own jokes—and sometimes others do too.

1. How many categories of students are there in this passage?

a) 6

b) 8

c) 10

d) 12

2. Which kind of student will never admit they are wrong?

- a) The Know-It-All b) The Teacher's Pet
- c) The Firefighter d) The Comedian

3. Who loves to laugh at their own jokes?

- a) The Know-It-All b) The Teacher's Pet
- c) The Firefighter d) The Comedian

4. _____ always tries to make the teacher happy.

- a) The Know-It-All b) The Teacher's Pet
- c) The Firefighter d) The Comedian

5. _____ waits to the last minute to study and do homework.

- a) The Know-It-All b) The Teacher's Pet
- c) The Firefighter d) The Comedian

6. According to the passage, which two types of students get poor grades?

- The poor student and the teacher's pet.
- The lazy types and the comedian.
- The poor student and the lazy type.
- The talker and the friendly type.

Please read the passage below and choose the answer which you think fits best according to the text (3 pts.)

Research suggests that there are creatures that do not know what light means at the bottom of the sea. They don't have either eyes or ears; they can only feel. There is no day or night for them. There are no winters, no summers, no sun, no moon, and no stars. It is as if a child spent its life in darkness in bed, with nothing to see or hear. How different our own life is! Sight shows us the ground beneath our feet and the heavens above us - the sun, moon, and stars, shooting stars, lightning, and the sunset. It shows us day and night. We are able to hear voices, the sound of the sea, and music. We feel, we taste, we smell. How fortunate we are!

7. Judging from the passage, we can say that this story is mainly about

- a) life of sea creatures at the bottom of the sea.
- b) how changes in the seasons are perceived by the deep-sea creatures.
- c) the superiority of human beings over some creatures in terms of senses.
- d) the differences among creatures of the earth and those of the sea.

8. We discover that the sea creatures in the story

- a) have the same senses that we do.
- b) have no sense of hearing as well as sight.
- c) hear the sounds of the ocean.
- d) live in darkness because no light reaches to the bottom.

9. In the passage a child in darkness is likened to

- a) someone who lives where there are no seasons.
- b) an animal without the sense of touch.
- c) a sea creature with no seeing or hearing ability.
- d) a deaf child unaffected by the environment.

Please read the passage below and choose the answer which you think fits best according to the text (3 pts.)

Official records state that the Pueblo Indians lived in New Mexico and Arizona. The word "Pueblo" comes from the Spanish word "pueblo," meaning town or village. The Spaniards found these Indians living in apartment houses, some of them on the side of a cliff in order that they could be reached only by ladders. Whenever they were attacked by Apaches, the Pueblos would pull up the ladders. They grew corn, which they watered with water flowing down in ditches. They wove cloth, made wonderful baskets, and created jars and pots out of clay proving how skillful they were at hand-craft.

10. From the passage we understand that the Pueblo Indians were afraid of

- a) cliff dwelling.
- b) Apache Indians.
- c) apartment houses.
- d) water flowing down in ditches.

11. Why the Spaniards called these Indians "Pueblos" is because they

- a) were close to the Apaches.
- b) lived together in a town or village.
- c) farmed and brought down water in ditches.
- d) pulled up their ladders when attacked.

12. The Pueblo Indians lived on the side of a cliff

- a) although they had apartment houses.
- b) to observe the stars in the sky for rain season.
- c) so that they could provide themselves with shelters.
- d) and, they didn't have a lake, a stream, or a pond.

Please read the passage below and choose the answer which you think fits best according to the text (3 pts.)

It was a man who lived before the time of Christopher Columbus that was the world's first great traveler. His name was Marco Polo. With his father and his uncle, he traveled from Italy to China, crossing mountains and deserts to get there. In China a king called Kublai Khan was pleased to see the Polos and had them live near to him. They stayed for twenty-three years. Kublai Khan sent Marco to other countries to do business for him. When Marco finally returned to Italy, he wrote all about his adventures in a book, which was read by Columbus and many other people, who also became interested in traveling to strange countries.

13. This story is mainly about

- a) the world's first great traveler.
- b) traveling from Italy to China.
- c) why Polo went to the far east.
- d) Marco Polo and Kublai Khan.

14. The reason that Marco Polo is called great is not that

- a) he traveled very far to reach China for a new world.
- b) he wrote about his adventures in a book, which many people read.
- c) he achieved fame thanks to his good reasoning.
- d) he crossed mountains and deserts to reach China.

15. We know from the story that after he turned back,

- a) Marco brought out a book inspiring new voyages.
- b) Marco stayed in Italy for twenty-three years.
- c) Kublai Khan knew that Marco had crossed mountains and deserts.
- d) Kublai Khan sent Columbus to other countries for business.

Please read the passage below and choose the answer which you think fits best according to the text (3 pts.)

Have you ever wondered whether fish drink or not? All living things must drink, and they require a fresh supply of water. A person can go without food for many days, but he or she cannot go for long without water. Fish drink, and fish that live in salt water must drink salt water. However, when we watch them in an aquarium and see them opening and closing their mouths, we must not assume that they are drinking. Fish need water for its oxygen. The water that they seem to be gulping gives them oxygen, which is in the water. On the other hand, when a fish drinks, it swallows water, just the way we do.

16. It is stated in the passage that a fish opens and closes its mouth

- a) in order to get oxygen.
- b) so as to gulp.
- c) to drink to stay alive.
- d) to swim in an aquarium.

17. We are informed by the passage that a person

- a) can live for a long time without water.
- b) can live for a long time without food.
- c) has no need for food and water.
- d) has no need for a fresh supply of water.

18. We are informed by the passage that a person

- a) can live for a long time without water.
- b) can live for a long time without food.
- c) has no need for food and water.
- d) has no need for a fresh supply of water.

19. When a fish drinks water,

- a) it requires fresh water.
- b) it swallows water just like us.
- c) it requires salt water.
- d) it drinks water for its oxygen.

Please read the passage below and choose the answer which you think fits best according to the text (2 pts.)

The world's nuclear plants have accumulated vast stocks of highly radioactive waste. Worldwide, high-level waste is currently stored above ground, and no government has a clear policy on its eventual disposal. While most experts believe that burying the waste is the safest bet in the long term, the problem is finding sites that everyone can agree are geologically stable. Decaying radioactive isotopes release heat. As a result, high-level waste must be constantly cooled; otherwise, it becomes dangerously hot. This is why many experts want to store waste above ground until it has decayed and is cool enough to be stored safely in sealed repositories several hundreds of meters below ground. According to one recent theory, however, waste should be lowered down boreholes drilled to 4 kilometers. The trick is to exploit heat generated by the waste to fuse the surrounding rock and contain any leaking radioactivity.

20. It is clear from the passage that the safe disposal of radioactive waste

- a) has been satisfactorily dealt with by scientists in conjunction with governments.
- b) is a problem that each government must decide on for its own country.
- c) remains a global problem of great magnitude.
- d) is a problem that has not attracted enough attention.

21. As it is pointed out in the passage, many experts believe the opinion that radioactive waste

- a) should never be stored underground as it cannot then be monitored.
- b) should not be stored underground while the radioactive isotopes continue to let off substantial amounts of heat.
- c) does not require to be cooled when stored above ground.
- d) cannot be safely disposed of anywhere and the problem of what to do with it intensifies as the amount increases.

Part II Vocabulary:

Choose the best meaning (5 pts.)

22. Improve

- a) Make or become better.
- b) Have the same opinion.
- c) Most severely or seriously.
- d) Villa.

23. Flavours

- a) Food and drinks.
- b) The distinctive taste of a food or drink.
- c) Eat something.
- d) Jam.

24. Village

- a) Slums.
- b) Small houses.
- c) Where people live smaller than city.
- d) Street name.

25. kHz

- a) Kilowatt.
- b) Kilowatt hour.
- c) Kilohertz.
- d) Kilometer.

26. MACA

- a) Media Access Control Address.
- b) Manifold absolute pressure.
- c) Measurement Systems Analysis.
- d) Kilowatt.

Civil Engineering Terms: (You should only answer your section's questions at vocabulary part!)

27. Abney level

- a) Buy a new product.
- b) Fast-on oscillator.
- c) A hand-held instrument to measure vertical angles.
- d) Measurement technique in which a voltage (or current) is forced at a remote point in a circuit.

28. Fabrication

- a) The construction or manufacture of something.
- b) Full-span output.
- c) Full-scale range.
- d) Programmable read-only.

29. Earth bar.

- a) A feature or device that measures the accumulated energy added to and removed from a battery, allowing accurate estimates of battery charge level.
- b) A battery intended to provide power to system memory while the main battery is replaced.
- c) A copper or brass bar that provides a common earthing point for electrical installations.
- d) Root mean square.

30. Inverter

- a) Two signals mix in non-linear circuits or devices.
- b) Standard method for data transfer used on the Internet.
- c) a large heavy head used to break up objects such as concrete.
- d) Controller Area Network.

31. Lux meter

- a) A device used to measure the amount of illuminance.
- b) The slight movement of a transmission signal in time or phase that can introduce errors and loss of synchronization.
- c) Megacycles per second (obsolete): Megahertz.
- d) Cable integrity monitor.

Electrical Engineering Terms: (You should only answer your section's questions at vocabulary part!)

27. PowerCap

- a) Buy a new product.
- b) Fast-on oscillator.
- c) A special surface-mount package with access to the internal cavity via an openable top.
- d) Measurement technique in which a voltage (or current) is forced at a remote point in a circuit

28. PRM

- a) Performance report message
- b) Full-span output.
- c) Full-scale range.
- d) Programmable read-only.

29. Battery monitor.

- a) A feature or device that measures the accumulated energy added to and removed from a battery, allowing accurate estimates of battery charge level.
- b) A battery intended to provide power to system memory while the main battery is replaced.
- c) A feature that monitors the voltage on a battery and indicates when the battery is low.
- d) Root mean square.

30. Inverter

- a) Two signals mix in non-linear circuits or devices.
- b) Standard method for data transfer used on the Internet.
- c) A switch-mode voltage regulator in which output voltage is negative with respect to its input voltage.
- d) Controller Area Network.

31. Chip

- a) Integrated circuit.
- b) The slight movement of a transmission signal in time or phase that can introduce errors and loss of synchronization.
- c) Megacycles per second (obsolete): Megahertz.
- d) Cable integrity monitor.

Mechanical Engineering Terms: (You should only answer your section's questions at vocabulary part!)

27. Back pressure

- a) Buy a new product.
- b) Fast-on oscillator.
- c) In a piping system, the pressure that opposes fluid flow because of baffles, bends, valves, etc.
- d) Measurement technique in which a voltage (or current) is forced at a remote point in a circuit.

28. Saddle

- a) The part of a lathe that carries the cross slide.
- b) Full-span output.
- c) Full-scale range.
- d) Programmable read-only.

29. Oblique valve

- a) A feature or device that measures the accumulated energy added to and removed from a battery, allowing accurate estimates of battery charge level.
- b) A battery intended to provide power to system memory while the main battery is replaced.
- c) A through-flow valve in which the valve stem and seat are at an angle to the main flow direction.
- d) Root mean square.

30. U-bolt

- a) Two signals mix in non-linear circuits or devices.
- b) Standard method for data transfer used on the Internet.
- c) It is used for clamping.
- d) Controller Area Network.

31. Zero gravity

- a) The situation in which there is no force of gravity.
- b) The slight movement of a transmission signal in time or phase that can introduce errors and loss of synchronization.
- c) Megacycles per second (obsolete): Megahertz.
- d) Cable integrity monitor.

Part III Grammar:

Match a question in A with a response in B. (4 pts.)

A	B
32. Would you like some more rice?	_____ a Black, no sugar. Have you got any decaf?
33. Could you pass the salt, please?	_____ b No, not at all. I got it online. I'll give you the website.
34. Can I have so water, please?	_____ c Do you want still or sparkling?
35. Please, just help yourselves to the dessert.	_____ d No, thanks. But could I have another piece of bread?
36. Would anybody like some more ice cream?	_____ e Yes, of course. Do you want the pepper, too?
37. How would you like your coffee?	_____ f No, but I'd love some more fruit. Is there any left?
38. This is delicious! Would you mind giving me the recipe?	_____ g No, of course not. You're our guests!
39. Do you want some help with the washing-up?	_____ h We will. It looks fantastic. Did you make it yourself?

Complete the sentence with a word from the box (3 pts.)

out at down on back off

40. Come in and take _____ your coat!
41. Put _____ something warm. It's cold today.
42. There's some ice-cream in the freezer. Can you get it _____?
43. If you don't feel well, go and lie _____.
44. Look _____ the countryside. Isn't it beautiful?
45. I'll lend you \$20. Pay me _____ when you can.

Part IV Essay: What do you think about the pollution in Bangkok and how we can make it better? (Min 100 words, you can use both sides of this paper, 11 pts.)

วิทยาลัยเทคโนโลยีอุตสาหกรรม

Mr. Baris Orses

Mr. Scott Bendlock
