

College of Industrial Technology
King Mongkut's University of Technology North Bangkok

Seat No.

Midterm Examination of Semester 1
Subject: 031001143 Reading
Date: 5 August 2024

Year: 2024
Section: 15-18
Time: 10.00-12.00

Name: ID: Class:

Directions: The test is designed to measure your comprehension. The exam has a total of 50 questions on 8 pages, including the cover, for a full score of 50 points.

- This exam paper contains no errors. If a suspected error is found, it is the student's discretion to correct it.
- Answer the questions on the answer sheet.
- Books, documents and lecture notes are not allowed.
- You must remain in the examination room for at least one hour after the exam starts, and while taking the exam, you cannot go out except in an emergency.
- It is forbidden to open or take out the exam paper with you without permission.
- Do not use any electronic communication device.
- Calculators cannot be used in this test.

You may now begin the test.

This exam paper is part of a set used to assess student abilities as follows:

		S1	S2	S3	S4	S5
CLO 1	Explain the structure of word usage in English reading.	√				
CLO 2	Tell the difference in the use of basic vocabulary.	√	√			
CLO 3	Analyze basic English words, phrases, and sentences.	√	√			
CLO 4	Analyze the main idea and details of the story read.			√	√	
CLO 5	Understand the meaning of words correctly and appropriately.					√

Cheating in the exam is considered an extremely serious offence which will result in expulsion from the University.

Part I: Language Development (10 Marks)**Items 1-10: Choose the most appropriate answer and mark "X" on your answer sheet. (10 Marks)**

1. Some people predict that the world's supply of oil will be used up in a few decades.

Replace the underlined phrasal verb with the academic verb.

- a. Some people predict that the world's supply of oil will be continued in a few decades.
 - b. Some people predict that the world's supply of oil will be increased in a few decades.
 - c. Some people predict that the world's supply of oil will be removed in a few decades.
 - d. Some people predict that the world's supply of oil will be exhausted in a few decades.
2. Multiple factors contribute to a(n) _____ problem. A(n) _____ high in fat is one; the increased _____ of sugary drinks is another.
- a. multinational, consumption, diet
 - b. poverty, diet, supermarket
 - c. obesity, diet, outlets
 - d. consumption, obesity, diet
3. You should begin thinking about the final _____ for this class, which is to write a 5,000-word paper on a topic of your choice.
- a. degree
 - b. assignment
 - c. journals
 - d. semester
4. Studies have shown that having a college degree makes a(n) _____ difference in how much a person earns over their lifetime.
- a. virtual
 - b. motivation
 - c. significant
 - d. principle
5. The likelihood of obesity increases if you have a(n) _____, which is why it is important to make exercise part of your daily routine.
- a. drug dependency
 - b. epidemic
 - c. preventable illness
 - d. sedentary lifestyle
6. A(n) _____ is a disease, like influenza, that spreads to a very large number of people in a short period of time.
- a. preventable illness
 - b. epidemic
 - c. patent
 - d. drug dependency
7. Surgeons need to work with great _____ during an operation.
- a. precise
 - b. precision
 - c. profession
 - d. professional
8. Nurses often have to work under _____ conditions, such as spending long hours in overcrowded hospitals.
- a. adverse
 - b. precise
 - c. adversity
 - d. adequate
9. Because the region has suffered a(n) _____ drought for the past two years, the agricultural economy has been devastated.
- a. natural
 - b. large-scale
 - c. extreme
 - d. ambitious
10. **Rewrite this phrase as academic noun phrase** "the act of manufacturing products"
- a. the manufacture production
 - b. the product manufacturing
 - c. the production manufacturing
 - d. the manufacturing production

Part II: Vocabulary (15 Marks)

Items 11-25: Choose the best answer and mark 'X' in the corresponding box. (15 Marks)

Items 11-12: Read the sentences and choose the correct definition for the words in bold.

11. The police did not have **concrete** evidence that Lawrence stole the car; therefore, they couldn't arrest him.

- a. belonging to or used by just one person
- b. based on actual things and particular examples
- c. able to hurt or damage
- d. the quality of being real or true

12. A core **principle** at my company is to make sure the employees come from a variety of different backgrounds in language and education.

- a. key value
- b. how much money and comfort someone has
- c. the physical environment where people live or work
- d. to make something certain to happen

Items 13-20: Choose the correct words to complete the sentences.

13. It's possible that Hana will lose her job soon, so she is applying to other companies as a(n) ____.

- a. safety net
- b. convenience
- c. consultation
- d. precaution

14. As an investor, I am always searching for entrepreneurs with good ideas, so I can help ____ the startup costs they need for their new businesses.

- a. increase
- b. evolve
- c. fund
- d. diminish

15. Oren makes an annual ____ to a charity that helps homeless people.

- a. substance
- b. specialty
- c. contribution
- d. assumption

16. Whenever you bring up a(n) ____ topic like politics, you have to expect people to disagree with you.

- a. chief
- b. controversial
- c. conventional
- d. concrete

17. Global warming is considered a ____ that affects ecosystems around the world.

- a. temporary issue
- b. local problem
- c. modern phenomenon
- d. short-lived trend

18. Due to overfishing, there has been a huge ____ in the number of fish in the world's oceans since the 1970s.

- a. contribution
- b. reduction
- c. issue
- d. increase

19. Children don't always understand the difference between right and wrong, so they ____ their parents to teach them.

- a. disrupt
- b. rely on
- c. monitor
- d. ignore

20. When too many tourists visit one destination, it can have ____ effects, such as increased pollution and overcrowding.

- a. conventional
- b. chief
- c. devastating
- d. moderate

Item 21-25: Choose the most appropriate answers in the box. (5 Marks)

monopoly	substance	convenience
influence	species	due to
ensure		

21. Since moving to the city, I have gotten used to the ____ of having food delivered

in rainy weather so that I don't have to get wet.

22. Some people worry that big businesses have too much _____ on our government.
23. Surprisingly, New York City is a good place for bird-watching because many different _____ live in the city parks.
24. _____ the unexpected snowstorm, all of the schools in the city are closed.
25. There was a sticky _____ on my jacket that I couldn't identify. Luckily, it came out when I washed it.

Part III: Unseen Passage 10 items

Items 26-35: Read the article and choose the best answer. (10 Marks)

วิทยาลัยเทคโนโลยีอุตสาหกรรม

Lying is a part of human nature. But how far will people go?

- A Psychologist Dan Ariely became interested in dishonesty about 15 years ago. During a long-distance flight, he came across an IQ test in a magazine. He answered the first question and checked the answer key to see if he got it right. He then took a quick look at the next answer before looking back at the quiz. He continued in this way through the whole test. Not surprisingly, he scored very well. "When I finished, I thought--I **cheated** myself," he says. So why did he do it? "**Presumably**, I wanted to know how smart I am, but I also wanted to prove I'm this smart to myself." The experience led Ariely to develop a lifelong interest in the study of lying and other forms of dishonesty.
- B To find out more about lying habits, Ariely developed a series of studies known as the Matrix Experiments. In the experiments, volunteers completed a test with 20 simple math problems. They were given five minutes to solve as many as they could. For each correct answer, **they** were told they would receive a **sum** of money. When the time was up, the volunteers counted the number of problems they solved correctly. They were then asked to destroy their answer sheets in a shredder¹. After **reporting** their own test **scores**, they were paid accordingly. However, there was something the volunteers didn't know. Their answer sheets were never actually destroyed.
- C By comparing actual test scores to reported scores, Ariely's research team found out how many volunteers **lied**, and how much they lied by. The results? Of the 40,000 people who **participated** in the experiment, nearly 70 percent lied about their test score. On average, volunteers said they solved six problems, but it was closer to four. The results are similar across different cultures. Most of us lie, but only a little.
- D The question Ariely finds most interesting is not why so many of us lie, but rather why we don't lie a lot more. In one version of the experiment, participants were offered significantly more money for each correct answer. However, this did not cause them to cheat more. "Here we give people a chance to steal lots of money, and people cheat only a little bit. So something stops us--most of us--from not lying all the way," Ariely says.
- E The reason, he believes, is that we want to see ourselves as **honest**, because honesty is a value taught to us by society. This is why most of us place limits on how much we lie. We may be able to come up with an **excuse** for taking Post-it Notes² from an office fairly easily. "But it is much more difficult to come up with an excuse for taking \$10,000," Ariely explains. The extent of our lying is determined largely by what is acceptable by society. "Cheating is easier," he says, "when we can **justify** our behavior."

1. A **shredder** is a machine that tears paper into thin pieces

2. **Post-it Notes** are small pieces of paper that are sticky on one side.

26. Why did Dan Ariely first become interested in researching dishonesty?
- He saw someone cheating on a test.
 - He looked at the answers for a quiz he was taking.
 - He lied to another passenger on an airplane.
 - He wanted to study human nature.
27. What was the main goal of the Matrix Experiments?
- To find out how much people lie.
 - To determine people's math skills.
 - To test the effects of money on cheating.
 - To study cultural differences in honesty.
28. Which of the following is true about the Matrix Experiments?
- Volunteers who lied about their score received no money.
 - The volunteers' answer sheets were destroyed.
 - The average volunteer solved four problems correctly.
 - The average volunteer solved six problems correctly.
29. What does "They" refer to in the **third sentence** of paragraph B?
- problems
 - researchers
 - volunteers
 - the experiments
30. What were volunteers told to do with their answer sheets after the test?
- Submitted them for review.
 - Destroyed them in a shredder.
 - Handed them to the researchers.
 - Kept them for future reference.
31. The version of the Matrix Experiment described in paragraph D involved _____.
- more money for correct answers
 - volunteers from different cultures
 - more than 20 problems
 - the cultural differences in lying
32. Which of the following statements best summarizes the conclusion Ariely draws in paragraph E?
- Stealing office equipment is more common than stealing money.
 - Most people in a society believe themselves to be honest.
 - We learn from society what kind of lies are acceptable.
 - Fear of getting caught.
33. What determines the extent of our lying, according to Ariely?
- Our financial situation.
 - What is acceptable by society.
 - Personal moral values.
 - Risk of punishment.
34. Why is it easier to justify taking Post-it Notes compared to \$10,000?
- Post-it Notes are less valuable.
 - It is more difficult to get caught.
 - There is less societal disapproval.
 - It is easier to come up with an excuse.
35. What aspect of dishonesty does Ariely find most interesting?
- The cultural differences in lying.
 - Why people lie in the first place.
 - Why people don't lie more often.
 - The psychological effects of lying.

Part IV: Seen Reading 5 items**Items 36-40: Read the article and answer. (5 Marks)****Should Health Care Be Free?**

1 Who pays for health care? The answer varies from country to country. In the United States, people often receive their health insurance through their employer. In other places, health care is completely free for all residents. There are also places where you can only see a doctor if you pay. Often, a patient is faced with the choice of medium-quality but cheap care versus high-quality but expensive care. Unfortunately, providing health care to an entire nation of citizens is a complicated matter. While different health care systems have various advantages and disadvantages, no system is ideal.

Free or Public Health Care

2 Within the countries that provide free public health care, there are many models. In some countries, consultations, treatment, and medicines are free to all citizens. This may be paid for directly by the government, perhaps funded by the country's valuable natural resources that the government owns. Other countries collect money from citizens through taxes based on their income. Workers pay according to how much they earn, and employers also make a contribution. Hospitals and other medical services are then provided and run by the government. There may also be some private medical services that people can choose to buy. The advantage of systems such as these is clear: free basic health care for all, regardless of income. However, it is a very expensive system and, as life expectancy and costs rise, many countries are facing either an unsustainable financial burden, or a drop in the quality of services and facilities provided.

Private Health Care

3 In countries where citizens use private providers, health care is only available to patients who pay for it, and health care providers are commercial companies. In wealthier countries, most citizens take out health insurance to cover their potential medical costs. However, not everyone can afford this, and some governments have a program that gives financial assistance to those who need urgent medical care but are unable to afford it. In other nations, there is no such safety net, and those who cannot pay simply do not get the health care they need, unless they can get help. The disadvantages of this system are obvious: not only are individuals deprived of the medical attention they need, but also the lack of preventative medicine means that infectious diseases can quickly spread. One advantage, however, is that commercial organizations can sometimes provide higher-quality care than struggling government-funded ones.

A Mixed System

4 In many countries, there is a mix of public and private funding. This system requires all its citizens to take out health insurance. This is deducted from salaries by the employer, who also has to make a contribution for each worker. Citizens are able to choose their health care providers, which may be public or private. However, in some systems, private companies are not permitted to make a profit from providing basic health care. This model provides more flexibility than either the public or private models, and ensures access to health care for all. However, it has been criticized for driving up the cost of labor, which can lead to unemployment.

Conclusion

5 Most of us will likely agree that no health care system is perfect. Several countries are now considering a combination of the models for their national health systems. The challenge is to find a system that

provides a high-quality level of health care to all citizens, but which is also affordable and practical. Whether or not such as system can work remains to be seen.

Answer the questions in short answers.

- 36. Which of the three systems described is most similar to the one your country follows? Why?
- 37. Which system gives people the best access to health care?
- 38. What do you think the best quality health care?
- 39. Which health care system might a person with a long-term illness prefer? Why?
- 40. Which system might a person with a high income prefer? Why?

Part V: Technical English (10 marks)

Items 41-50: Match each word in the box with its definitions. There are TWO unused words.

Scheme	Solar	Gasworks	Geothermal
Open coal fires	Biofuel	Uranium	Hydraulic
Commission	Sun	Petroleum	Kinetic

- 41. This type of energy comes from the sun.
- 42. The main way of heating homes in the UK before central heating.
- 43. The reactor in nuclear power stations contains a nuclear fuel such as ____.
- 44. Another word for oil.
- 45. This is hydroelectric power station together with its dam and reservoir.
- 46. This is where gas was made from coal in the past.
- 47. This kind of energy us in things that are moving, e.g. a moving turbine.
- 48. When a nuclear plant is put into action it is ____.
- 49. This heat some from the earth itself.
- 50. This power comes from the pressure or movement of a liquid.
