

College of Industrial Technology
King Mongkut's University of Technology North Bangkok

Seat number

Examination of Midterm Examination of Semester 1

Subject: 031001143 Reading

Date Tuesday, August 5, 2025

Examination Setter Name: Anchalee laowklang, Asim Baris Orses, Asst. Prof. Kitti Chalermchatwarakorn, Sasithorn Silthon, Natcharee Phadongled

Student Name.....ID.....Class.....No.....

Year 2568

Section 1-17

Time 15.00 - 17.00

Directions:

1. This examination paper has not been edited. If any errors are identified, students are advised to exercise discretion in addressing them.
2. The examination consists of 50 questions on 8 pages (including the cover page).
The total score is 25 points.
3. Complete all questions in the answer booklet.
4. Books, documents and lecture notes are not allowed
5. Students must remain in the examination room for no less than 1 hour from the start of the examination.
6. Do not open or start the examination before permission is granted. Students must strictly follow the instructions of the examination.
7. Access to restroom facilities during the examination is not permitted, except in cases of emergency
8. Students are not allowed to take the examination paper or copy the examination paper out of the examination room. Otherwise, it will be considered cheating.
9. Usage of all communication devices during the examination is strictly prohibited.
10. Smart watches (electronic watches) are not permitted during the exam.

Cheating in examinations is considered a serious offense and carries the penalty of expulsion from student status.

This examination is part of the assessment of students' abilities as follows:

		Part 1	Part 2	Part 3	Part 4	Part 5
CLO 1	Explain the structure of word use in English reading.	✓				
CLO 2	Can tell the differences in word usage in reading.	✓	✓			
CLO 3	Analyze words, phrases, and sentences in English reading.	✓	✓			
CLO 4	Analyze the main idea and details of the story that you have read.			✓	✓	
CLO 5	Understand the meaning of words correctly and appropriately.					✓

Part I: Language Development (10 Marks)**Items 1-10: Choose the most appropriate answer and mark "X" on your answer sheet. (10 Marks)**

1. Some countries are _____ labor cost regulations, allowing some companies to pay their workers unfairly.
a. removing b. studying c. increasing d. excluding
2. The supplier didn't read the instructions carefully, and the two orders got _____.
a. continued b. exhausted c. confused d. removed
3. _____, or the condition of being extremely overweight, has doubled since 1980. It is now no longer confined to certain countries, like the United States, but has become a(n) _____ problem.
a. Diets, poverty b. Obesity, multinational c. Obesity, poverty d. Diets, consumption
4. There are two _____: one in the spring and one in the fall. You will complete three modules in each one.
a. journals b. seminars c. tutors d. semesters
5. His _____ for pursuing a Master's of Business Administration was to please his parents, not because he wanted to make money.
a. principle b. core c. motivation d. aspect
6. In the United States, a(n) _____ gives a pharmaceutical company the exclusive right to produce and market a drug for 20 years.
a. preventable illness b. patent c. underfunding d. epidemic
7. Nurses often have to work under _____ conditions, such as spending long hours in overcrowded hospitals.
a. precise b. adverse c. adversity d. physicality
8. Acid rain has had a _____ impact on forest ecosystems.
a. devastating b. controlled c. long-term d. natural
9. Rewrite this phrase as academic noun phrase "the act of manufacturing products"
a. the manufacture production b. the product manufacturing
c. the production manufacturing d. the manufacturing production
10. Rewrite this phrase as academic noun phrase "the process of emitting greenhouse gases"
a. greenhouse gas emissions b. gas emitting greenhouse
c. gas emissions greenhouse d. greenhouse gas emissions

Part II: Vocabulary (15 Marks)**Items 11-20: Choose the best answer and mark 'X' in the corresponding box. (10 Marks)**

11. The two countries agreed to set up a clear _____ to avoid future conflicts.
a. community b. surgery c. boundary d. burden
12. The store is offering a 20% _____ on all winter clothing this weekend.
a. policy b. discount c. launch d. side effect
13. Celebrities often have a big _____ on young people's fashion choices.
a. issue b. monitor c. influence d. burden
14. It is against the law to _____ someone at work or school.
a. launch b. insist c. harass d. ensure

15. The company plans to _____ its new smartphone next month.
a. influence b. reduce c. increase d. launch
16. Many people choose to study for a(n) _____ because it's more flexible.
a. burden b. experiment c. online degree d. issue
17. Feeling tired is a common _____ of this medication.
a. policy b. influence c. boundary d. side effect
18. The doctor said that _____ is the best option to treat her condition.
a. surgery b. discount c. reduction d. alternative
19. Taking care of his sick parents is a heavy _____ on him.
a. influence b. burden c. community d. symptom
20. The school has a strict _____ about using mobile phones in class.
a. treatment b. labour c. policy d. risk

Items 21-25: Choose the most appropriate answers in the box. (5 Marks)

measure	maintenance	transform	crucial	reservoir
---------	-------------	-----------	---------	-----------

21. Education has the power to _____ lives and open up new opportunities.
22. The town's main water _____ supplies clean drinking water to thousands of homes.
23. It is _____ to wear a seatbelt for your safety while driving.
24. The government introduced a new _____ to reduce air pollution in the city.
25. Regular _____ of the equipment will help prevent unexpected breakdowns.

Part III: Unseen Passage (10 items)

Items 26-35: Read the article and choose the best answer. (10 Marks)

Self-diagnosis

- 1 We rely on online sources for our medical problems more. Many people now choose to diagnose themselves online when they are sick. We are now more likely to google our symptoms before speaking to a partner, friend, family member, doctor, or pharmacist. The most common illnesses or conditions people search for are physical pains such as back pain, mental problems such as depression, food reactions such as allergies, and serious conditions such as diabetes. While many of us rely on this information, how accurate and reliable is it?
- 2 Many people think that the Internet has made it easier for us to diagnose our own illnesses, but research suggests that using the Internet can be a very bad way of getting the right medical treatment. The main problem comes from one of two things. Firstly, we can be too positive about how severe our symptoms are. The other problem is the opposite: some people are too negative about their situation. For example, the same symptom might be understood by one person as indigestion, but another could understand it as a heart attack.

- 3 These reactions and the availability of technology have led some to argue that we are creating a generation of "worried well". Sometimes people use software that is not tested or scientific to research their symptoms. In people who are already anxious, this poor information can lead to worry. Generally, the more frightening an article is, the more of your attention it is likely to get. Forums can also make people worry a lot. Anxious people are likely to then go to a doctor to find medical help even if they don't always need it. The main problem actually comes from people who do not worry as much though. If they do not diagnose themselves accurately, they may not go to a doctor even though they have a serious medical condition.
- 4 A new kind of online software is called a symptom checker. These programs try to analyze our symptoms and offer advice as to whether we should seek further medical help, such as go to see a doctor or pharmacist. Researchers at the Harvard Medical School found that, although these programs are often wrong, they are more accurate than a general Internet search. However, getting the right diagnosis might not be as important as getting the right advice about whether, or how quickly, to visit a doctor. Under tests, for symptoms that were severe and would need emergency care, the researchers found that the software was right 80% of the time, but Internet searches for the same information were only right 64% of the time.
- 5 At the moment, self-diagnosis is quite basic, but some argue that we will have much more sophisticated self-care in place in the next 20 years. For example, body scanners in shops might be able to diagnose illnesses faster and more effectively than doctors. The system could also give drugs, like a pharmacist does, and make appointments with a doctor. This, along with using wearable technology such as watches, means we could have dozens of daily statistics about our health. In just a few years, googling your symptoms could seem quite an old-fashioned method as technology starts to constantly check our health.

GLOSSARY

diagnose (v) to find out what physical or mental problem someone has by examining them

diagnosis (n) a statement about what disease someone has, based on examining them

indigestion (n) feeling unwell from eating food, often too quickly

26. What is the main idea of this reading passage?

- a. People can now diagnose their illnesses better than doctors.
- b. Online self-diagnosis is common but can be unreliable or even dangerous.
- c. Symptom checkers are always correct and safe to use.
- d. The Internet has solved most health problems in the world.

27. What do many people do before speaking to a doctor?

- a. Take medicine
- b. Visit the hospital
- c. Search their symptoms online
- d. Ask a pharmacist

28. What is NOT True about the internet?

- a. The Internet makes everyone worry about their health more.
- b. People often check physical symptoms, like back pain, online.
- c. Many people think that the Internet has made it easier for us to diagnose our illness.
- d. Symptom checkers are better than the Internet in general.

29. What is one danger of using the Internet for self-diagnosis?
- It always gives wrong information.
 - It makes you pay money.
 - It causes more illness.
 - It can give you the wrong idea about how serious your symptoms are.
30. What does "worried well" refer to?
- People who are healthy but worry too much
 - People with serious illnesses
 - People who never go to the doctor
 - People who use medicine every day
31. What kind of information makes anxious people more worried?
- Short articles
 - Funny videos
 - Scary information or forums
 - Positive news
32. What is a symptom checker?
- A website where doctors post health articles.
 - A machine that gives you medicine automatically.
 - A program that analyzes symptoms and gives medical advice.
 - A type of medicine for treating common illnesses.
33. According to research, how often are symptom checkers correct for emergency symptoms?
- 50%
 - 64%
 - 70%
 - 80%
34. What might body scanners in shops do in the future?
- Sell products
 - Diagnose illnesses and give medicine
 - Make people exercise
 - Give fashion advice
35. What may happen to googling symptoms in the future?
- It will become illegal.
 - It will become more popular.
 - It will be replaced by better technology.
 - It will be taught in schools.

Part IV: Seen Reading 5 items

Items 36-40: Read the article and answer. (5 Marks)

Distance Learning vs. Face-to-Face Learning

1 Although many people think it is a modern phenomenon, distance learning has been around for at least 200 years in one form or another. Historical examples of long-distance learning include students being sent a series of weekly lessons by mail. The technological advances of the past 20 or so years, however, have meant that this form of education is now a credible alternative to face-to-face learning. Indeed, 1996

saw the establishment of the world's first "virtual university" in the United States, showing how far distance learning has come in a relatively short space of time. While it is now possible to obtain a large variety of online degrees, which is the best type of education to pursue? A closer examination of this topic reveals that distance and traditional educational instruction have significant differences but also some similarities.

2 When comparing the two systems, the most obvious difference lies in the way that instruction is delivered. Distance learning is heavily dependent on technology, particularly the Internet. In a face-to-face course, students may only require a computer for the purpose of writing an essay. In comparison, when learning remotely, technology is the principal means of communication. Face-to-face instruction must take place in real time and in one location. Conversely, distance learning can happen at any time and in any location, since the learning is not restricted by geography. The flexibility this provides means that students may be better able to learn at their own pace, but it may also mean that learners have to be well organized and self-disciplined. In other words, they must be more highly motivated in order to do well in distance-learning courses. Finally, with face-to-face learning, the teacher and student have the opportunity to develop a personal relationship. In a virtual classroom, by contrast, the teacher may seldom or never actually meet the student. This may make it hard for teachers to understand their students' specific learning needs.

3 Although the nature of the teacher-student relationship may differ in the two methods, they do share the same core principles. Just as a teacher is the "knower" in a classroom, he or she is the one responsible for helping students understand the key sections of an online course. The teacher needs to decide how to best present the material to be learned and in which sequence the topics should be introduced. He or she must also create the assignments for the course and help the students know what resources (textbooks, websites, and so on) will best support their learning. Additionally, a teacher needs to provide student feedback in some way. For example, a language teacher in a classroom may be able to correct a student's grammar or pronunciation in the moment, whereas a distance-learning teacher may need to provide written or recorded feedback to be delivered later. In any case, all the usual elements of the teacher's role are necessary, no matter what kind of instruction is being used.

4 It is difficult to state whether one form of learning is better than another, since they are geared toward different learning situations. They are certainly different experiences. Nevertheless, there are strong similarities between the two systems, which can both produce positive results. A student who has the choice should consider the advantages and disadvantages of each method before deciding to take a course.

36. Why do some people think distance learning is a modern idea?

37. Why can online learning be slightly impersonal?

38. How would teacher feedback differ between the two methods in a language course?

39. Does the author of article generally approve or disapprove of distance learning?

40. Which type of learning do you prefer: face-to-face learning or distance learning? Why?

Part V: Technical English (10 marks)

Items 41-50: Match the part of the car with its function. There are TWO unused words.

accelerator	differential	brake line	silencer/muffler
fuel tank	brake cylinder	exhaust manifold	clutch
engine	radiator	steering wheel	battery

- 41. Ensures that the rear wheels turn at a different speed to each other when a car corners.
- 42. Connects the brake cylinder to the brakes.
- 43. Used by the driver to turn the car.
- 44. Disconnects the engine from the gearbox while the gears are changed.
- 45. Carries waste gases to the exhaust pipe.
- 46. Provides the power.
- 47. Cools water from the engine.
- 48. Makes the car go faster when it is pressed.
- 49. Reduces the exhaust noise.
- 50. Stores electricity.
