

College of Industrial Technology

King Mongkut's University of Technology North Bangkok

Final Examination of Semester 2

Year: 2018

Subject: 393142 English II

Section: 15-18

Date: 23 April 2019

Time: 08.00 -10.00

Name: _____ ID: _____ Class: _____

Directions: The test is designed to measure your comprehension. The test is divided into 5 sections. There will be 19 pages (including this page) and they are worth 40 points.

- Answer the questions on the Answer Sheet (last page).
- Books, documents and lecture notes are not allowed.
- You must be in the room for one hour after the exam is started and, while taking the exam, you cannot go out except in an emergency case.
- Before leaving, make sure you do not bring this test outside.
- Do not use any electronic communication devices.
- Calculators cannot be used in this test.

Cheating in the exam is considered an extremely serious offence which will result in expulsion from the University.

Part I Reading and understanding

Please read the article and choose the best answer (10 pts.):

Reality Television

Reality television is a genre of television programming which, *it is claimed*, presents unscripted dramatic or humorous situations, documents actual events, and features ordinary people rather than professional actors. It could be described as a form of artificial or "heightened" documentary. Although the genre has existed in some form or another since the early years of television, the current explosion of popularity dates from around 2000.

Reality television covers a wide range of television programming formats, from game or quiz shows which resemble the frantic, often demeaning programmes produced in Japan in the 1980s and 1990s (a modern example is Gaki no tsukai), to surveillance- or voyeurism- focused productions such as Big Brother.

Critics say that the term "reality television" is somewhat of a misnomer and that such shows frequently portray a modified and highly influenced form of reality, with participants put in exotic locations or abnormal situations, sometimes coached to act in certain ways by off-screen handlers, and with events on screen manipulated through editing and other post-production techniques.

Part of reality television's appeal is due to its ability to place ordinary people in extraordinary situations. For example, on the ABC show, The Bachelor, an eligible male dates a dozen women simultaneously, travelling on extraordinary dates to scenic locales. Reality television also has the potential to turn its participants into national celebrities, outwardly in talent and performance programs such as Pop Idol, though frequently Survivor and Big Brother participants also reach some degree of celebrity.

Some commentators have said that the name "reality television" is an inaccurate description for several styles of program included in the genre. In competition-based programs such as Big Brother and Survivor, and other special-living-environment shows like The Real World, the producers design the format of the show and control the day-to-day activities and the environment, creating a completely fabricated world in which the competition plays out. Producers specifically select the participants, and use carefully designed scenarios, challenges, events, and settings to encourage particular behaviors and conflicts. Mark Burnett, creator of Survivor and other reality shows, has agreed with this assessment, and avoids the word "reality" to describe his shows; he has said, "I tell good stories. It really is not reality TV. It really is unscripted drama."

1) In the first line, the writer says 'it is claimed' because,

- a) they agree with the statement.
- b) everyone agrees with the statement.
- c) they want to distance themselves from the statement.
- d) no one agrees with the statement.

2) Reality television

- a) has been popular since approximately 2000.
- b) always been this popular.
- c) has been popular since well before 2000.
- d) has only been popular since 2000.

3) Japan

- a) is the only place to produce demeaning TV shows.
- b) has produced demeaning TV shows copied elsewhere.
- c) produced Big Brother.
- d) invented surveillance focused productions.

4) People have criticized reality television because,

- a) it is demeaning.
- b) it shows reality.
- c) it uses exotic locations.
- d) the name is inaccurate.

5) Reality TV appeals to some because,

- a) it shows eligible males dating women.
- b) it shows average people in exceptional circumstances.
- c) it uses exotic locations.
- d) it can turn ordinary people into celebrities.

วิทยาลัยเทคโนโลยีอุตสาหกรรม

6) The term 'reality television' is inaccurate

a) for special-living-environment programs.

c) for all programs.

b) for talent and performance programs.

d) just for Big Brother and Survivor.

7) Pop Idol

a) turns all its participants into celebrities.

b) is less likely to turn its participants into celebrities than Big Brother.

c) is more likely to turn its participants into celebrities than Big Brother.

d) is a dating show.

8) Producers choose the participants

a) to create conflict among other things.

c) on the ground of talent.

b) only for special-living-environment shows.

d) to make a fabricated world.

9) Mark Burnett

a) was a participant on Survivor.

c) thinks the term 'reality television' is inaccurate.

b) is a critic of reality TV.

d) writes the script for Survivor.

10) Shows like Survivor

a) are definitely reality TV.

c) are scripted.

b) are theatre.

d) have good narratives.

Part II Vocabulary

Please read the passage and choose the best word (10 pts.):

Space Food

Eating in space is much more difficult than it is on Earth because food does not stay in one place. Astronauts can only have 1.7 kg of food per person per day, so the size and weight of the container is important. You won't find a(11)..... of jam or a glass(12)..... of water on the International Space Station because glass is too heavy. You won't see a(13)..... of apples either, because fresh fruit doesn't last very long.

In the past, all of the food in space had the same texture as toothpaste, and astronauts had a(14)..... of food at each meal. Now things have changed and most of the(15)..... are made

of plastic. However, some food is the same as it is at home, and perhaps once a week, it is possible to have a(16).... of tuna or a(17).... of ham for lunch.

Drinking is also more difficult in space. Most drinks come in plastic cups, and astronauts have to add cold or hot water to the cup. You won't find a(18).... of lemonade or a(19).... of juice anywhere in(20)....

11) find a(11).... of jam

- a) tin b) jar c) cartons d) bottles

12) a glass(12).... of water

- a) tin b) cans c) bottle d) box

13) see a(13).... of apples

- a) can b) bottle c) tube d) packet

14) astronauts had a(14).... of food

- a) tube b) tin c) bottle d) packet

15) most of the(15).... are

- a) tin b) container c) packet d) bottle

16) to have a(16).... of tuna

- a) tin b) packet c) container d) bottle

17) or a(17).... of ham

- a) bottle b) tube c) box d) packet

18) find a(18).... of lemonade

- a) bottle b) tube c) carton d) tin

19) or a(19).... of juice

- a) can b) box c) carton d) tube

20) anywhere in(20)....

- a) empty b) dust c) space d) box

Part III Grammar

Please complete the article with the correct form of the verbs (6 pts.):

Eat Less Meat

What(21).... if everybody in the world stopped eating meat? There is no question that humans eat far too much meat, but(22)..... it really be better if all of us were vegetarians? Every day, millions of people around the world work with animals on farms. if we all(23)..... vegetarians, there would be fewer animals to look after. We would keep cows to give us milk and hens to give us eggs, but we(24)..... as many farm workers. Where(25)..... they go to find a new job? On the other hand, cows produce 18% of the world's greenhouse gases, so if we(26)..... beef, it would be better for the environment.

21) What(21).... if everybody

- a) will happen
- b) can happen
- c) do happen
- d) would happen

22) but(22)..... it

- a) will
- b) can will
- c) would
- d) would be

23) we all(23)..... vegetarians

- a) became
- b) will become
- c) become
- d) would become

24) we(24)..... as many

- a) would need
- b) will need
- c) won't need
- d) wouldn't need

25) Where(25)..... they go

- a) would
- b) will
- c) won't
- d) wouldn't

26) so if we(26)..... beef

- a) do eat
- b) don't eat
- c) eat
- d) didn't eat

Part IV Word Meaning

Please choose the best words to complete the article (10 pts.):

Who doesn't love a hero? Well, not everybody. Some people are not(27).... to confess they prefer the bad guy. Here are four heroes and a villain:

James Bond: This(28).... secret agent is always(29).... and charming, even in the end-of-world situations.

Severus Snape: All the students were(30).... this strict teacher, but in the end he was a hero.

Erin Brockovich: Julia Roberts plays a/an(31).... woman who fights against big corporation.

Sanjuro Tsubaki: The samurai(32).... by Toshiro Mifune is an example of the(33).... who is always(34).... no matter the cost.

Hannibal Lecter: Forget the(35).... Joker in Batman. The worst villain of all movies, according to the American Film Institute, is this highly(36).... psychiatrist from the the silence of the lambs.

27) people are not(27).... to confess

- a) calm b) to calm c) to embarrass d) embarrassed

28) This(28).... secret agent

- a) ordinary b) to heroic c) heroic d) to ordinary

29) is always(29).... and charming

- a) afraid of b) calm c) to calm d) afraid

30) students were(30).... this strict teacher

- a) afraid of b) brave of c) brave d) afraid

31) Julia Roberts plays a/an(31).... woman who fights against big corporation.

- a) selfish b) ordinary of c) ordinary d) selfish of

32) The samurai(32).... by Toshiro Mifune

- a) played b) to played c) to show d) show

33) an example of the(33).... who is always

- a) being lucky b) lucky c) brave d) being brave

34) who is always(34).... no matter the cost.

- a) to be embarrass b) embarrass c) to be honest d) honest

35) Forget the(35).... Joker in Batman.

- a) to be crazy b) mad c) to be mad d) crazy

36) is this highly(36).... psychiatrist

- a) to educate b) educate c) to be educated d) educated

Part V General English

37) The students get monthly which usually include writing a report.

- a) instructions b) mental c) assignment d) term

38) Half of the courses in our department were There were a variety of courses to choose from.

- a) optional b) independently c) instructions d) peer

39) Children need to be taught to learn at primary school, otherwise they can't get anywhere in their school life.

- a) optional b) term c) independently d) instructions

40) In most countries, schools have two, or semesters, while in others there can be up to six.

- a) terms b) optional c) instructions d) assignment

Part VI

Directions: Choose the best answer to replace the word(s) in BOLD and Underlined

41) I've got more free time than I used to have, so I'm going **to start** a new sport. _____.

- a) give up b) take up c) set up d) give in

42) We called the station to **discover** the times of the trains. _____

- a) find out b) set up c) give up d) put on

- 43) It was cold, so I covered myself in a warm coat before I left home. _____
 a)put on b)give up c)set up d)take up
- 44) People often ask children what they want to be when they get older. _____
 a)give up b)grow up c)take up d)put on
- 45) They placed the new television carefully on the table. _____
 a)put down b)take up c)grow up d)give up
- 46) I couldn't do the homework so in the end, I had to stop. _____
 a)give up b)set up c)take up d)put on
- 47) I know a lot about computers, but I can't afford to start my own company. _____
 a)put down b)set up c)grow up d)put on

Complete the following with the best possible answer.

- 48) A. I don't think you should put your personal details on social media.
 B. Yeah, _____.
 a) I don't have b) In my opinion c) Yeah, but d) I agree
- 49) A. What do you think of modern technology?
 B. _____, the world is changing too fast.
 a) I don't think b) I disagree c) In my opinion d) I don't have
- 50) A. I think people should pay to download films.
 B. I'm afraid _____.
 a) In my opinion b) I disagree c) Yeah, but d) I don't have
- 51) A. Do you think people should stop posting photos on the internet?
 B. Not really. _____ strong views on that.
 a) I don't have b) I disagree c) I don't has d) Yeah, but

52) A. You should have a different password for each of your accounts.

B. _____ they're so difficult to remember.

- a) I agree b) Yeah, but c) I don't have d) In my opinion

53) A. What's your opinion of free newspapers?

B. _____ you can believe everything you read.

- a) I agree b) I don't think c) a good point d) Yeah, but

54) A. If you use a different name, your friends won't be able to find you.

B. That's _____.

- a) agreed b) a good point c) I don't have d) I disagree

Directions: Complete the blanks with the correct business related term

55) How much people work in your _____?

- a) team b) town c) city d) country

56) When was the last time your company recruited new _____?

- a) staff b) service c) site d) students

57) Who does most of the _____ in your office?

- a) coffee b) tea c) paperwork d) talking

58) Where do you go when you have to entertain _____?

- a) clients b) parties c) you d) them

59) How many _____ do you have to attend each week?

- a) outings b) towns c) meetings d) classes

60) Who deals with customer _____ in your company?

- a) cakes b) service c) functions d) enquiries

61) Do you get nervous before you give _____?

- a)presents b)advice c)phone call d)presentations

62) Who runs the day-to-day _____ of your department?

- a)customers b)advice c)business d)taxes

63) How many _____ do you receive each day?

- a)boss b)weekly c)emails d)United States

Leaders in Crisis - Franklin D. Roosevelt

Franklin Roosevelt was born into wealth. He attended the best private schools and dabbled in the study of law. Then he found politics. On that stage, he became a bright new star. Then, at the age of 39, the young man of privilege was stricken with polio. He was paralyzed. With his legs withered and useless, Roosevelt's career appeared to be over. But Roosevelt battled his way back to health. In a wheel chair and leg braces, he went on with his career. When the stock market crashed in 1929, Roosevelt was governor of New York. His state plunged into economic chaos with the rest of the nation. President Hoover and the country's leaders struggled with massive problems. More businesses and banks closed every day. The nation's farms were dying. Millions of unemployed people looked to the government for help. Hoover's cautious policies seemed to produce little fruit. Americans cried out for solutions. Roosevelt ran for president in 1932. He offered voters a "New Deal." He promised to work for the average American, the "forgotten man." He gave few details of what he planned, but voters liked what they heard. Roosevelt was elected by a landslide. Meanwhile, the nation sank deeper into decline. On March 3, 1933, over 5,000 banks closed. Roosevelt took office on March 4. He immediately set about reassuring the American people. "The only thing we have to fear is fear itself!" Roosevelt declared. The next day, the new president announced a "bank holiday." All banks were closed. The U.S. Treasury Department inspected bank records. Banks found to be solvent were re-opened. Those teetering toward bankruptcy remained closed until they were healthy again. This action stabilized the banking system. People felt that a re-opened bank carried a federal stamp of approval. These banks were safe places to leave their money. A flurry of activity marked Roosevelt's first three months in office. This period came to be known as the "Hundred Days." First, the president called Congress into special session. Everyone worked at a furious pace. Roosevelt submitted bill after bill aimed at reviving the ailing nation. Relief, recovery, and

reform were his priorities. Laws were passed to help those in need. Several programs were enacted to provide jobs. Some bills provided funds for cities and states to help the needy. Other measures dealt with business. Some called for widespread changes in labor practices. Funds were allotted to award contracts to private companies for construction of public buildings, dams, bridges, and roads. Thousands of people were put to work. Bills were passed to help farmers. Production limits were set so that farmers could sell products for better prices. Money was set aside for loans to strapped farmers. Other laws limited the power of banks to foreclose on farm mortgages. Then, banking reform laws were passed. Most of these were aimed at protecting investors from fraud. Other measures backed bank deposits with federal guarantees. Through all the activity, contact with the people was an important element of Roosevelt's plan. He called frequent news conferences. He also held informal "fireside chats" on radio. In these broadcasts, he explained what he was doing to help the economy. He took great pains to encourage people and to voice his concern for their plight. Roosevelt's active approach to the presidency was a new path for America. Up to this point, the practice had always been to limit government influence on the lives of citizens. Roosevelt firmly believed that government should be proactive. He thought federal power should be used to create a climate of well-being for the common people. Not all of Roosevelt's many experiments worked. Some were abandoned. Some were struck down by the Supreme Court. Critics thought Roosevelt was undermining private enterprise. He was accused of steering the nation towards socialism. Neither did Roosevelt cure the nation of its economic ills. In spite of all he did, the Depression dragged on through most of his long tenure as president. But in the nation's darkest days, people found hope in Roosevelt's leadership. Things were getting better, he told them. There really was nothing to fear. Four times in succession, Americans voted for him as their leader. His confidence and charm captured the nation. His energy and compassion made people believe his message.

64) What job did Roosevelt have while running for president in 1932?

- | | |
|-------------------------|-------------------------|
| a) Governor of New York | c) Governor of Maryland |
| b) Vice President | d) Secretary of Defense |

65) The "Hundred Days" was:

- a) the first three months of furious activity of the Roosevelt administration
- b) the length of time Republicans predicted Roosevelt would last in office
- c) the period of time the Depression lasted after Roosevelt took office
- d) the length of time between the election and Roosevelt's assuming office

66. What were the "fireside chats"?

- a) Roosevelt's visits to the living rooms of private citizens
- b) Roosevelt's radio broadcasts explaining his policies to the people
- c) informal meetings where Roosevelt and his staff planned strategy
- d) newspaper articles written by Roosevelt outlining his plans

Piranhas

Piranhas, sometimes called cannibal fish (or caribe in Spanish), have a notorious reputation! Tales are told that schools of piranhas ("puh-rah-nuhs") attack animals - large or small - with no mercy. They sink their sharp teeth into their victim's flesh and devour it quickly. Within minutes, their victim is reduced to nothing but bones. Found only in the tropical areas of South America, are piranhas really as nasty as rumored? Well, the answer to this chilling question is "not really." There are about twelve different species of piranhas. The one that we are the most familiar with is the red-bellied piranha or the red piranha. Surprisingly, as ferocious as they are believed to be, not all types of piranhas are meat-eaters! Some of them rely on their razor sharp teeth and powerful jaws to crack fruits and seeds that fall into the water. For the types that do eat meat like red-bellied piranhas, they often attack animals smaller than themselves, such as other fish, frogs, insects, or birds. Piranhas don't usually attack a large animal unless they are very hungry, or the victim is weak or injured. In fact, the Indians of South America have been known to swim in rivers full of piranhas without getting bitten even once. So, why do piranhas stir so much fear? Interestingly, this legend can be traced all the way back to President Theodore Roosevelt. In his book *Through the Brazilian Wilderness* published in 1914, he described a horrifying encounter with piranhas. What the president saw were schools of piranhas, trapped and starving, attacking a bleeding cow that was thrown into the water by a

tour guide. Ever since then, piranhas have had a reputation to be bloodthirsty, aggressive, and fierce.

67) Where can we find piranhas?

- a) South Africa b) South America c) Southern Australia d) North America

68) Which of the following statements about piranhas is true?

a) President Theodore Roosevelt published a book in 1914 describing his encounter with piranhas.

b) Piranhas live in the tropical areas of North America.

c) Piranhas attack all animals that dare to enter the water.

d) Red-bellied piranhas are vegetarians.

69) In which South American country did President Theodore Roosevelt have a horrifying encounter with piranhas?

- a) Chile b) Brazil c) Bolivia d) Argentina

70) Who wrote the book Through the Brazilian Wilderness?

a) President George Washington

c) President Franklin

b) President Theodore Roosevelt

d) President Barack Obama

71) Which of the following statements about piranhas is NOT true?

a) Piranhas have razor-sharp teeth and powerful jaws.

b) The Indians of South America have always stayed away from the rivers full of piranhas.

c) Piranhas don't usually attack a large animal unless they are starving, or the victim is weak or injured.

d) Some species of piranhas are actually vegetarians.

South Carolina Ordinance of Nullification

Some people think that when the South seceded from the United States, that it was a sudden decision. Nothing could be further from the truth. The first real challenge about states' rights happened almost thirty years before the secession leading up to the Civil War. In 1828, a new tariff was passed by the Congress of the United States. The purpose of it was not only to get revenue, but to equalize the prices of goods produced in the U.S. with cheaper goods imported from abroad. When goods came in from overseas, a heavy tax was applied. The importers would pass the cost of the tax on to the customers. Since most of these goods were imported to the Southern states, many of the people living there considered it a tax against them. Rich land owners especially resented this new cut into their profits. John C. Calhoun, a native South Carolinian and Vice President of the United States, was vocally against it. He was a strong advocate for states' rights and thought the tariff was unfair. He joined in his state's protest. In 1830 he made a speech declaring that the tariff was unconstitutional. Robert Y. Hayne, the S.C. Senator, declared that the issue was one of States' Rights versus the rights of centralized power. A second tariff was signed into law in 1832. It was a slightly milder form of the 1828 tariff but still an "abomination" to many in the South. Late in 1832, the problems came to a head. Calhoun believed that liberty was more important than the Federal Union of States. President Andrew Jackson believed just the opposite. (In those days the Vice President was elected independently from the President, not as running mates.) In November 1832, the South Carolina State government met to discuss the on going problem. No real solution seemed to be in sight, so they drafted the Ordinance of Nullification, on November 23, 1832. It declared that certain laws that infringed on the individual rights of States, enacted by the United States Congress, were null and void. In this case, the heavy tariffs were not recognized as law in South Carolina. The South Carolina legislature went on to say that they would consider any show of military force--to enforce the law--an act of war. This would include any blockading of the port of Charleston. In response to that action, Jackson immediately sent seven small naval vessels and a man o' war (ship) to Charleston. Then in December he issued a proclamation against those who supported nullification. He said the country was on "the brink of insurrection and treason." Vice President Calhoun resigned from his position. Jackson's political rival, Henry Clay, stepped in to propose a new tariff. It would slowly reduce the current tariff levels to those that had been in effect in 1816. It was quickly passed, and both sides claimed victory. After the passage of the compromise 1833 tariff, Congress gave the President power, through the Force Bill, to use military force to collect tariffs from states. Two weeks later, on March 15, 1833, South Carolina rescinded the Ordinance of Nullification. Just three days later, on March 18, 1833, South Carolina nullified the Force Bill. Jackson considered it a victory because he had gotten his way,

and the federal government's power was enforced. While South Carolinians seemed to have lost overall, they actually gained. Though the state had stood alone through the controversy, they got nearly all the concessions they had wanted. They also made the other Southern states aware of their minority status in the face of a Northern majority.

72) Why was Calhoun against the tariff of 1828?

- a) It took away some states' rights.
- b) It made imported products too expensive.
- c) It made imported products cheaper.
- d) He didn't like any taxes.

73) The 1828 Tariff was referred to as an "abomination" by Southerners. Choose the definition that best describes the word.

- a) Anger
- b) Loathing
- c) Disgust
- d) Explosive

74) What description below best defines the word Nullification?

- a) Invalid
- b) Disintegrated
- c) Nothing
- d) Empty

75) Andrew Jackson was in favor of:

- a) Power of the federal government.
- b) The right to nullify laws.
- c) Liberty
- d) States' rights

The Archaic Period

More than 5,000 years ago, the Minoans on the island of Crete built a great civilization that officially ushered the Greeks into the Bronze Age. As that culture reached its peak around 1600 B.C., another great civilization, the Mycenaean civilization, began to flourish on mainland Greece. At the time, the Greeks were among the most advanced people on Earth. They knew how to fashion weapons using metals. They made beautiful potteries. They produced striking statues. And they constructed magnificent palaces. For a long while, the Greeks' authority had gone unchallenged. But the Dorians changed all that with their invasion at the onset of the 12th century B.C. Now with the Mycenaean civilization crushed, the once blissful days turned bleak. From that point on to about 800 B.C., the Greeks were in the Dark Ages. For nearly three hundred years, they had nothing of any significance to show for it; it was as if they were living inside a cultural vacuum. When they at last emerged from it, however, they spun such a rich civilization in the so-called Archaic Period that its impact can still be felt today! During the days of the Archaic Period, the Greeks established numerous city-states. Originally, those city-states

were all governed by monarchies. But by the middle of the 7th century B.C., one of them decided to break the ranks and try something totally different. That particular city-state was Athens, and the person who made it happen was Solon (638 B.C. - 558 B.C.) Solon was a famous Athenian lawmaker. He saw how harsh the existing Draco's laws were and, subsequently, how much his fellow citizens were suffering. To make the current legal system more humane, he issued a new set of laws and abolished many severe punishments. One of them was to bar creditors from forcing debtors into slavery. Solon's reforms had a profound bearing in Athens. For example, in the new constitution he introduced, he divided the Athenians into four groups based on their wealth. People from the top two classes could become members of the Areopagus; they were the effective rulers of Athens. People from the third class could become members of the Boule or Council of Four Hundred; they were the advisors to the Areopagus. Lastly, people from the fourth or the poorest class could have their own Assembly; they were entitled to elect local magistrates and vote on matters presented by the Council of Four Hundred. Because Solon encouraged all Athenian citizens to take part in running public affairs, he helped to lay the foundation of democracy. Later, around 508 B.C., Cleisthenes (also spelled as Clisthenes or Kleisthenes), the archon (chief magistrate) of Athens, aligned himself with the immensely popular Assembly by placing powers directly in the hands of people. Thanks to him, the world's first democratic government was born. Needless to say, democracy was a very crucial achievement across the entire span of the Archaic Period (800 B.C. - 500 B.C.) But it was certainly not the only one. In terms of arts, the Greeks from this era were particularly fond of making happy-looking statues. Later, scholars gave this unique style of beaming expression a neat name. They called it the Archaic smile. In terms of architecture, the Greeks developed two distinct orders, the Doric and the Ionic. Both use columns as structural supports. There are three major differences between the two styles. First, an Ionic column has more flutes on its shaft than a Doric one. Second, all Doric columns normally rest directly atop a common platform, whereas each Ionic column stands on an individual base. Third, the capital (the top or crown) of a Doric column is smooth. It flares from the column to meet a square abacus. But the capital of an Ionic column is fancier. It is topped with paired scroll-like ornaments or volutes. In terms of entertainment, the Greeks organized their first Olympic Games in 776 B.C. at Olympia. Originally, they used the occasion to honor their most powerful deity, Zeus. Every four years, the Greeks held competitions for various sports, such as running, long-jump, and wrestling. All free male Greek citizens, regardless of their social status, were entitled to participate in the games; female contestants were very rare. Notably, to let female athletes have a chance to compete as well, the Greeks also staged the Herean Games every four years to bestow their respect for Hera (Zeus' wife). The Olympic Games lasted for nearly twelve

centuries, long after the end of the Archaic Period. It was discontinued by the Roman Emperor Theodosius I in 393 A.D. He banned the event because he considered it a part of the pagan (non-Christian) culture. In terms of literature, after spending nearly three hundred years in the Dark Ages, the Greeks once again began writing. Famous writers such as Aesop and Homer all penned their masterpieces during the Archaic Period. Their works were so inspiring that they continue to attract fans from all corners of the world. The Greek civilization from the Archaic Period truly revolutionized our societies. Without it, the concept of democracy might not have been born at all. Without it, modern buildings might not look as sturdy and elegant as they are today. And without it, Greek mythology might have been lost forever. In short, without Greece's Archaic Period, our world history would be completely different!

76) How many classes did the Athenian society have in Solon's days?

- a) six b) three c) four d) five

77) Who was credited for forming the world's first democratic government?

- a) Cleisthenes b) Solon c) Draco d) Plato
